Education

Indian Institute Of Information Technology, Nagpur

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Nagpur, Maharashtra

Projects

FormiFi | *Next.js, Prisma, OpenAI, TypeScript, and Docker* | [-Github](#)

Jan 25 - Present

- Developed a **SaaS** web application that reduced manual form creation time by 40% using OpenAI APIs.
- Designed an intuitive **Admin Panel** with role-based access control, reducing data management time by 50% by streamlining user data handling, automated record updates, and efficient query execution.
- Implemented **AI-powered** form generation using OpenAI's API, automating 80% of the form creation process and enhancing user experience.
- Integrated a **payment gateway** to facilitate secure and efficient transactions for users.

AcadX Tech | *MERN Stack* | [-Github](#)

Sept 24 - Dec-24

- Prepared a full-stack web application for Web Services Industries using **React** and **Node.js**, improving service request processing speed by 40%.
- Integrated **OAuth authentication** to seamlessly access and manage user data, ensuring secure handling of sensitive information and providing efficient management capabilities.
- Created an **intuitive Admin Panel** to facilitate easy management and maintenance of the user database, significantly enhancing **operational efficiency** by 50%.
- Developed and optimized **CRUD** (Create, Read, Update, Delete) operations, ensuring a 30% increase in data retrieval efficiency and a seamless user experience.

Portfolio Website | *Next.js, Tailwind CSS, Framer Motion* | [-Github](#)

May 24 - June 24

- Built a responsive portfolio website using **Next.js** with server-side rendering for enhanced performance and **SEO**.
- Integrated **Framer Motion** for interactive animations, adding dynamic visual elements to improve user engagement.
- Built a modern, friendly UI with **Tailwind CSS**, ensuring a smooth user experience across devices and reducing development time by 40%.
- Improved **dark mode feature**, allowing users to switch between light and dark themes for a personalized experience and increasing user satisfaction by 15%.

Technical Skills

Languages: Java, C, C++, HTML/CSS, JavaScript

Frameworks: React.js, Node.js, Express.js, Tailwind

Developer Tools: Git, GitHub, Linux, Visual Studio, IntelliJ, Android Studios

Databases : MongoDB, MySQL

Achievements

- Solved more than 500+ coding problems across platforms.
- Completed Google Cloud Computing Foundations Certification Course by Google.
- Completed Web Development Certification Course by Coincent.
